Subject index

Absorption spectroscopy
Anion adsorption on clean or copper modified Pt(111) and Rh(111) electrode surfaces studied by in-situ infrared reflection absorption spectroscopy (Shingaya, Ito) 283
Acetonitrile + water mixtures
Ionic properties in acetonitrile + water mixtures and dimethylformamide + water mixtures (Gregory et al.) 75
Ac stripping voltammetry
Ac stripping voltammetry from mercury film electrodes. Part 1. Theoretical analysis (Rodríguez Nieto et al.) 3
Adsorption
Hydrogen evolution reaction: analysis of the Volmer–Heyrovsky–Tafel mechanism with a generalized adsorption model (Gennero de Chialvo, Chialvo) 209
Adsorption of tin on platinum: an uncommon underpotential deposition (Lamy-Pitara et al.) 233
Voltammetric behaviour of irreversibly adsorbed SO_2 on a Pt(111) electrode in sulphuric acid medium (Quijada et al.) 243
A comment on the article "on the application of ^{125}I isotope for radiotracer adsorption studies (radiochemical considerations), by A. Kolics and G. Horanyi", JEC 3292. (Bockris, Gamboa-Aldeco) 273
Anion adsorption on clean or copper modified Pt(111) and Rh(111) electrode surfaces studied by in-situ infrared reflection absorption spectroscopy (Shingaya, Ito) 283
Adsorption states
New information on the unusual adsorption states of Pt(111) in sulphuric acid solutions from potentiostatic adsorbate replacement by CO (Feliu et al.) 265
Angular momentum
A novel approach to the polydiacetylene Langmuir–Blodgett film by the surface-specific optical third harmonic generation based on the angular momentum conservation rule (Sato et al.) 279
Aprotic solvents
Ionic properties in acetonitrile + water mixtures and dimethylformamide + water mixtures (Gregory et al.) 75

Carbohydrates
Electrocatalytic oxidation of carbohydrates at copper(II)-modified electrodes and its application to flow-through detection (Kano et al.) 137
Carbon microelectrodes
A potentiostatic study of silver centres and their catalytic effect on hydrogen peroxide using carbon microelectrodes (Sousa) 151
Carbon monoxide
Ex-situ TDS investigation of carbon monoxide electrosorbed on polycrystalline platinum (Dalbeck et al.) 251
New information on the unusual adsorption states of Pt(111) in sulphuric acid solutions from potentiostatic adsorbate replacement by CO (Feliu et al.) 265
Carbon paste electrodes
Chronoamperometric and cyclic voltammetric study of carbon paste electrodes using ferricyanide and ferrocenemonocarboxylic acid (Taliene et al.) 85
Catalysis
Two electrodes modified with metalloporphyrins via an ester linkage and their catalysis of the cathodic reduction of dioxygen (Pang et al.) 269
Catalytic efficiency
Cathodic cleavage of organic compounds on electrodes coated with polymeric materials. Catalytic efficiency of solid cathodes modified by polyfluorenes or polydibenzofuran (Simonet et al.) 185
Cathodic cleavage
Cathodic cleavage of organic compounds on electrodes coated with polymeric materials. Catalytic efficiency of solid cathodes modified by polyfluorenes or polydibenzofuran (Simonet et al.) 185
Chronoamperometry
Chronoamperometric and cyclic voltammetric study of carbon paste electrodes using ferricyanide and ferrocenemonocarboxylic acid (Taliene et al.) 85
CO adsorption
Effects of surface modification on double-layer impedance of platinum electrodes in an acid solution. Part 1. Adsorption of carbon monoxide (Matsui, Kunugi) 225
Conducting polymers
The origin of the discrepancy between the low frequency AC capacitances and voltammetric capacitances of conducting polymers (Ren, Pickup) 289
Copper(II)-modified electrodes
Electrocatalytic oxidation of carbohydrates at copper(II)-modified electrodes and its application to flow-through detection (Kano et al.) 137
CO_2 reduction
A new homogeneous electrocatalyst for the reduction of carbon dioxide to methanol at low overpotential (Seshadri et al.) 145
Correlation analysis
Prediction of the Gibbs energy of ion transfer across the water|nitrobenzene interface using three new topological indices (Wang et al.) 21
Current-step excitation
Calculation of impedance spectra by Laplace transformation of voltage transients generated by current-step excitation (Neumann-Spallart, Etman) 33
Cyclic voltammetry
Chronoamperometric and cyclic voltammetric study of carbon paste electrodes using ferricyanide and ferrocenemonocarboxylic acid (Taliene et al.) 85

Differential capacitance
The application of the MPB4 theory to the interface between two immiscible electrolyte solutions Part 1. The differential capacitance of the water|nitrobenzene interface (Cui et al.) 15
Differential electrochemical mass spectrometry
New on-line mass spectrometer system designed for platinum-single crystal electrode and electroreduction of acetylene (Gao et al.) 195

Dimethylformamide + water mixtures
Ionic properties in acetonitrile + water mixtures and dimethylformamide + water mixtures (Gregory et al.) 75
Dioxygen
Two electrodes modified with metalloporphyrins via an ester linkage and their catalysis of the cathodic reduction of dioxygen (Pang et al.) 269
Dioxygen reduction
Electrochemical behavior of [octaethylporphyrin iron(III)-σ-bonded pyrrole] and its electrocatalytic activity for the reduction of dioxygen (Dong et al.) 171
Discontinuity
The impedance of an electrode for the situation where there is a discontinuous change of the electrode condition with potential due to the formation of a two-dimensional condensed phase (Armstrong) 27
Double-layer
Effects of surface modification on double-layer impedance of platinum electrodes in an acid solution. Part 1. Adsorption of carbon monoxide (Matsui, Kunugi) 225

Electrocatalytic oxidaton
Electrocatalytic oxidation of carbohydrates at copper(II)-modified electrodes and its application to flow-through detection (Kano et al.) 137
Electrocatalytic properties
Electrochemical and electrocatalytic properties of iron(III)-substituted Dawson-type tungstophosphate anion (Dong, Liu) 95
Electrochemical formation
Electrochemical process of formation of an insulating polypyrrole film (Osaka et al.) 201
Electrochemical polymerization
Comparative spectroelectrochemical investigation of vacuum evaporated and electrochemically synthesized electrochromic polyaniline films (Ivanov et al.) 57
Electrochemical quartz crystal microbalance
Electrochemical quartz crystal microbalance studies of self-assembled monolayers of 11-ferrocenyl-1-undecanethiol: structure-dependent ion-pairing and solvent uptake (Shimazu et al.) 117
Electrochemic polyanailine films
Comparative spectroelectrochemical investigation of vacuum evaporated and electrochemically synthesized electrochromic polyaniline films (Ivanov et al.) 57
Electrode impedance
The impedance of an electrode for the situation where there is a discontinuous change of the electrode condition with potential due to the formation of a two-dimensional condensed phase (Armstrong) 27
Electrode|solid|solvent (electrolyte) interface
Mechanistic aspects of the electron and ion transport processes across the electrode|solid|solvent (electrolyte) interface of microcrystalline decamethylferrocene attached mechanically to a graphite electrode (Bond, Marken) 125
Electrogenerated chemiluminescence
Solvent and temperature control of the reaction mechanism and efficiency in the electrogenerated chemiluminescence of rubrene (Kapturkiewicz) 101
Electron transfer reaction
Chronoamperometric and cyclic voltammetric study of carbon paste electrodes using ferricyanide and ferrocenemonocarboxylic acid (Taliene et al.) 85
Electron transport
Mechanistic aspects of the electron and ion transport processes across the electrode|solid|solvent (electrolyte) interface of microcrystalline decamethylferrocene attached mechanically to a graphite electrode (Bond, Marken) 125
Electroreduction
Two electrodes modified with metalloporphyrins via an ester linkage and their catalysis of the cathodic reduction of dioxygen (Pang et al.) 269
Electrosoprtion
Ex-situ TDS investigation of carbon monoxide electrosorbed on polycrystalline platinum (Dalbeck et al.) 251
Ester linkage
Two electrodes modified with metalloporphyrins via an ester linkage and their catalysis of the cathodic reduction of dioxygen (Pang et al.) 269
1,2-Ethanediol
Ion transfer from water to formamide or 1,2-ethanediol studied by polarography at the electrolyte solution dropping electrode (Suzuki) 39

Ferricyanide
Chronoamperometric and cyclic voltammetric study of carbon paste electrodes using ferricyanide and ferrocenemonocarboxylic acid (Taliene et al.) 85
Ferrocenemonocarboxylic acid
Chronoamperometric and cyclic voltammetric study of carbon paste electrodes using ferricyanide and ferrocenemonocarboxylic acid (Taliene et al.) 85
Ferrocene units
Modified electrodes from organic-inorganic hybrid gels containing ferrocene units covalently bonded inside a silica network (Audebert et al.) 275
11-Ferrocenyl-1-undecanethiol
Electrochemical quartz crystal microbalance studies of self-assembled monolayers of 11-ferrocenyl-1-undecanethiol: structure-dependent ion-pairing and solvent uptake (Shimazu et al.) 117
Flow-through analysis
Electrocatalytic oxidation of carbohydrates at copper(II)-modified electrodes and its application to flow-through detection (Kano et al.) 137
Formamide
Ion transfer from water to formamide or 1,2-ethanediol studied by polarography at the electrolyte solution dropping electrode (Suzuki) 39
FTIR studies
Reduced CO_2 on polycrystalline Pd and Pt electrodes in neutral solution: electrochemical and in situ Fourier transform IR studies (Taguchi et al.) 161

Gibbs energy
Prediction of the Gibbs energy of ion transfer across the water|nitrobenzene interface using three new topological indices (Wang et al.) 21
Graphite electrode
Mechanistic aspects of the electron and ion transport processes across the electrode|solid|solvent (electrolyte) interface of microcrystalline decamethylferrocene attached mechanically to a graphite electrode (Bond, Marken) 125

Homogeneous electrocatalyst
A new homogeneous electrocatalyst for the reduction of carbon dioxide to methanol at low overpotential (Seshadri et al.) 145
Hydrogen
Hydrogen evolution reaction: analysis of the Volmer–Heyrovsky–Tafel mechanism with a generalized adsorption model (Gennero de Chialvo, Chialvo) 209

^{125}I
On the application of the ^{125}I isotope for radiotracer adsorption studies (radiochemical considerations) (Kolics, Horányi) 261
[octaethylporphyrin iron(III)-σ-bonded pyrrole]
Electrochemical behavior of [octaethylporphyrin iron(III)-σ-bonded pyrrole] and its electrocatalytic activity for the reduction of dioxygen (Dong et al.) 171
Impedance
Effects of surface modification on double-layer impedance of platinum electrodes in an acid solution. Part 1. Adsorption of carbon monoxide (Matsui, Kunugi) 225
Impedance spectra
Calculation of impedance spectra by Laplace transformation of voltage transients generated by current-step excitation (Neumann-Spallart, Etman) 33
Infrared reflection
Anion adsorption on clean or copper modified Pt(111) and Rh(111) electrode surfaces studied by in-situ infrared reflection absorption spectroscopy (Shingaya, Ito) 283
Ionic properties
Ionic properties in acetonitrile + water mixtures and dimethylformamide + water mixtures (Gregory et al.) 75
Ion-pairing
Electrochemical quartz crystal microbalance studies of self-assembled monolayers of 11-ferrocenyl-1-undecanethiol: structure-dependent ion-pairing and solvent uptake (Shimazu et al.) 117
Ion transfer
Prediction of the Gibbs energy of ion transfer across the water|nitrobenzene interface using three new topological indices (Wang et al.) 21
Ion transfer from water to formamide or 1,2-ethanediol studied by polarography at the electrolyte solution dropping electrode (Suzuki) 39
Ion transport
Mechanistic aspects of the electron and ion transport processes across the electrode|solid|solvent (electrolyte) interface of microcrystalline decamethylferrocene attached mechanically to a graphite electrode (Bond, Marken) 125
ITIES
The application of the MPB4 theory to the interface between two immiscible electrolyte solutions Part 1. The differential capacitance of the water|nitrobenzene interface (Cui et al.) 15
Ion transfer from water to formamide or 1,2-ethanediol studied by polarography at the electrolyte solution dropping electrode (Suzuki) 39

Lambert–Beer
A comment on the article "on the application of ^{125}I isotope for radiotracer adsorption studies (radiochemical considerations), by A. Kolics and G. Horanyi", JEC 3292. (Bockris, Gamboa-Aldeco) 273
Langmuir-Blodgett
A novel approach to the polydiacetylene Langmuir–Blodgett film by the surface-specific optical third harmonic generation based on the angular momentum conservation rule (Sato et al.) 279
Laplace transformation
Calculation of impedance spectra by Laplace transformation of voltage transients generated by current-step excitation (Neumann-Spallart, Etman) 33
Low frequency AC capacitances
The origin of the discrepancy between the low frequency AC capacitances and voltammetric capacitances of conducting polymers (Ren, Pickup) 289
Low overpotential
A new homogeneous electrocatalyst for the reduction of carbon dioxide to methanol at low overpotential (Seshadri et al.) 145

Marcus theory
Solvent and temperature control of the reaction mechanism and efficiency in the electrogenerated chemiluminescence of rubrene (Kapturkiewicz) 101
Mathematical model
The impedance of an electrode for the situation where there is a discontinuous change of the electrode condition with potential due to the formation of a two-dimensional condensed phase (Armstrong) 27
Mathematical models
The application of the MPB4 theory to the interface between two immiscible electrolyte solutions Part 1. The differential capacitance of the water|nitrobenzene interface (Cui et al.) 15
Mercury film electrodes
Ac stripping voltammetry from mercury film electrodes. Part 1. Theoretical analysis (Rodríguez Nieto et al.) 3
Metalloporphyrin
Two electrodes modified with metalloporphyrins via an ester linkage and their catalysis of the cathodic reduction of dioxygen (Pang et al.) 269
Microcrystalline decamethylferrocene
Mechanistic aspects of the electron and ion transport processes across the electrode|solid|solvent (electrolyte) interface of microcrystalline decamethylferrocene attached mechanically to a graphite electrode (Bond, Marken) 125
Modified carbon pastes
Electrochemical characterization of carbon pastes modified with proteins and polycations (Kulys et al.) 49
Modified electrodes
Two electrodes modified with metalloporphyrins via an ester linkage and their catalysis of the cathodic reduction of dioxygen (Pang et al.) 269
MPB4 theory
The application of the MPB4 theory to the interface between two immiscible electrolyte solutions Part 1. The differential capacitance of the water|nitrobenzene interface (Cui et al.) 15

Nitrobenzene interface
The application of the MPB4 theory to the interface between two immiscible electrolyte solutions Part 1. The differential capacitance of the water|nitrobenzene interface (Cui et al.) 15

On-line mass spectrometer system
New on-line mass spectrometer system designed for platinum-single crystal electrode and electroreduction of acetylene (Gao et al.) 195
Organic compounds
Cathodic cleavage of organic compounds on electrodes coated with polymeric materials. Catalytic efficiency of solid cathodes modified by polyfluorenes or polydibenzofuran (Simonet et al.) 185
Organic-inorganic hybrid gels
Modified electrodes from organic-inorganic hybrid gels containing ferrocene units covalently bonded inside a silica network (Audebert et al.) 275

Photoelectrochemical plating
STM study of photoelectrochemical plating on p-type silicon electrodes (Yoshihara et al.) 91
Photothermal deflection spectroscopy
Photothermal deflection spectroscopy investigations of uranium dioxide oxidation (Rudnicki et al.) 63
Platinum
Adsorption of tin on platinum: an uncommon underpotential deposition (Lamy-Pitara et al.) 233

Platinum(111)
Voltammetric behaviour of irreversibly adsorbed SO_2 on a Pt(111) electrode in sulphuric acid medium (Quijada et al.) 243
New information on the unusual adsorption states of Pt(111) in sulphuric acid solutions from potentiostatic adsorbate replacement by CO (Feliu et al.) 265
Platinum electrodes
Effects of surface modification on double-layer impedance of platinum electrodes in an acid solution. Part 1. Adsorption of carbon monoxide (Matsui, Kunugi) 225
Platinum-single crystal electrode
New on-line mass spectrometer system designed for platinum-single crystal electrode and electroreduction of acetylene (Gao et al.) 195
Polarography
Ion transfer from water to formamide or 1,2-ethanediol studied by polarography at the electrolyte solution dropping electrode (Suzuki) 39
Polycations
Electrochemical characterization of carbon pastes modified with proteins and polycations (Kulys et al.) 49
Polycrystalline electrodes
Reduced CO_2 on polycrystalline Pd and Pt electrodes in neutral solution: electrochemical and in situ Fourier transform IR studies (Taguchi et al.) 161
Polycrystalline platinum
Ex-situ TDS investigation of carbon monoxide electrosorbed on polycrystalline platinum (Dalbeck et al.) 251
Polydibenzofuran
Cathodic cleavage of organic compounds on electrodes coated with polymeric materials. Catalytic efficiency of solid cathodes modified by polyfluorenes or polydibenzofuran (Simonet et al.) 185
Polyfluorenes
Cathodic cleavage of organic compounds on electrodes coated with polymeric materials. Catalytic efficiency of solid cathodes modified by polyfluorenes or polydibenzofuran (Simonet et al.) 185
Polymer-coated electrodes
Cathodic cleavage of organic compounds on electrodes coated with polymeric materials. Catalytic efficiency of solid cathodes modified by polyfluorenes or polydibenzofuran (Simonet et al.) 185
Polypyrrole
Electrochemical process of formation of an insulating polypyrrole film (Osaka et al.) 201
Potentiostatic adsorbate replacement
New information on the unusual adsorption states of Pt(111) in sulphuric acid solutions from potentiostatic adsorbate replacement by CO (Feliu et al.) 265
Potentiostatic study
A potentiostatic study of silver centres and their catalytic effect on hydrogen peroxide using carbon microelectrodes (Sousa) 151
Proteins
Electrochemical characterization of carbon pastes modified with proteins and polycations (Kulys et al.) 49
P-type silicon
STM study of photoelectrochemical plating on p-type silicon electrodes (Yoshihara et al.) 91
Pyridinium ion
A new homogeneous electrocatalyst for the reduction of carbon dioxide to methanol at low overpotential (Seshadri et al.) 145

Radiochemical considerations
A comment on the article "on the application of ^{125}I isotope for radiotracer adsorption studies (radiochemical considerations), by A. Kolics and G. Horanyi", JEC 3292. (Bockris, Gamboa-Aldeco) 273
Radiochemistry
On the application of the ^{125}I isotope for radiotracer adsorption studies (radiochemical considerations) (Kolics, Horányi) 261
Radiotracer adsorption
On the application of the ^{125}I isotope for radiotracer adsorption studies (radiochemical considerations) (Kolics, Horányi) 261
Reaction mechanism
Solvent and temperature control of the reaction mechanism and efficiency in the electrogenerated chemiluminescence of rubrene (Kapturkiewicz) 101
Reduced CO_2
Reduced CO_2 on polycrystalline Pd and Pt electrodes in neutral solution: electrochemical and in situ Fourier transform IR studies (Taguchi et al.) 161
Rubrene
Solvent and temperature control of the reaction mechanism and efficiency in the electrogenerated chemiluminescence of rubrene (Kapturkiewicz) 101

Scanning tunnelling microscopy
STM study of photoelectrochemical plating on p-type silicon electrodes (Yoshihara et al.) 91
Self-assembled monolayers
Electrochemical quartz crystal microbalance studies of self-assembled monolayers of 11-ferrocenyl-1-undecanethiol: structure-dependent ion-pairing and solvent uptake (Shimazu et al.) 117
Silica
Modified electrodes from organic-inorganic hybrid gels containing ferrocene units covalently bonded inside a silica network (Audebert et al.) 275
Silver centres
A potentiostatic study of silver centres and their catalytic effect on hydrogen peroxide using carbon microelectrodes (Sousa) 151
Solvation potential
Ionic properties in acetonitrile + water mixtures and dimethylformamide + water mixtures (Gregory et al.) 75
Solvent control
Solvent and temperature control of the reaction mechanism and efficiency in the electrogenerated chemiluminescence of rubrene (Kapturkiewicz) 101
Solvent uptake
Electrochemical quartz crystal microbalance studies of self-assembled monolayers of 11-ferrocenyl-1-undecanethiol: structure-dependent ion-pairing and solvent uptake (Shimazu et al.) 117
Spectroelectrochemistry
Comparative spectroelectrochemical investigation of vacuum evaporated and electrochemically synthesized electrochromic polyaniline films (Ivanov et al.) 57
Sulphur dioxide
Voltammetric behaviour of irreversibly adsorbed SO_2 on a Pt(111) electrode in sulphuric acid medium (Quijada et al.) 243
Sulphuric acid medium
Voltammetric behaviour of irreversibly adsorbed SO_2 on a Pt(111) electrode in sulphuric acid medium (Quijada et al.) 243
Sulphuric acid solutions
New information on the unusual adsorption states of Pt(111) in sulphuric acid solutions from potentiostatic adsorbate replacement by CO (Feliu et al.) 265
Surface chemistry
Photothermal deflection spectroscopy investigations of uranium dioxide oxidation (Rudnicki et al.) 63
Surface modification
Effects of surface modification on double-layer impedance of

platinum electrodes in an acid solution. Part 1. Adsorption of carbon monoxide (Matsui, Kunugi) 225
Surface structure
STM study of photoelectrochemical plating on p-type silicon electrodes (Yoshihara et al.) 91
Electrochemical quartz crystal microbalance studies of self-assembled monolayers of 11-ferrocenyl-1-undecanethiol: structure-dependent ion-pairing and solvent uptake (Shimazu et al.) 117

Temperature control
Solvent and temperature control of the reaction mechanism and efficiency in the electrogenerated chemiluminescence of rubrene (Kapturkiewicz) 101
Thermal desorption spectroscopy
Ex-situ TDS investigation of carbon monoxide electrosorbed on polycrystalline platinum (Dalbeck et al.) 251
Tin
Adsorption of tin on platinum: an uncommon underpotential deposition (Lamy-Pitara et al.) 233
Topological indices
Prediction of the Gibbs energy of ion transfer across the water|nitrobenzene interface using three new topological indices (Wang et al.) 21
Tungstophosphate anion
Electrochemical and electrocatalytic properties of iron(III)-substituted Dawson-type tungstophosphate anion (Dong, Liu) 95
Two-dimensional condensed phase
The impedance of an electrode for the situation where there is a discontinuous change of the electrode condition with potential due to the formation of a two-dimensional condensed phase (Armstrong) 27

Underpotential deposition
Adsorption of tin on platinum: an uncommon underpotential deposition (Lamy-Pitara et al.) 233

UO_2
Photothermal deflection spectroscopy investigations of uranium dioxide oxidation (Rudnicki et al.) 63

Vacuum evaporation
Comparative spectroelectrochemical investigation of vacuum evaporated and electrochemically synthesized electrochromic polyaniline films (Ivanov et al.) 57
Volmer–Heyrovsky–Tafel
Hydrogen evolution reaction: analysis of the Volmer–Heyrovsky–Tafel mechanism with a generalized adsorption model (Gennero de Chialvo, Chialvo) 209
Voltage transients
Calculation of impedance spectra by Laplace transformation of voltage transients generated by current-step excitation (Neumann-Spallart, Etman) 33
Voltammetric capacitances
The origin of the discrepancy between the low frequency AC capacitances and voltammetric capacitances of conducting polymers (Ren, Pickup) 289
Voltammetry
Voltammetric behaviour of irreversibly adsorbed SO_2 on a Pt(111) electrode in sulphuric acid medium (Quijada et al.) 243

Water
The application of the MPB4 theory to the interface between two immiscible electrolyte solutions Part 1. The differential capacitance of the water|nitrobenzene interface (Cui et al.) 15
Ion transfer from water to formamide or 1,2-ethanediol studied by polarography at the electrolyte solution dropping electrode (Suzuki) 39
Water|nitrobenzene interface
Prediction of the Gibbs energy of ion transfer across the water|nitrobenzene interface using three new topological indices (Wang et al.) 21
